

"D" Deploy the e-Framework

The fourth objective is "To deploy the DEST / JISC framework as a planning, dissemination and implementation support tool for infrastructure development".

RUBRIC activities for this objective will include:

- D1 Contributing to the development of the e-Framework in collaboration with Australian liaison and international partners
- D2 Working with the Australian research infrastructure community to embed these processes in Australian project processes
- D3 Creating and publishing documentation relating to the e-Framework
- D4 Participating in standards and specification development activities relating to the development of the e-Framework
- D5 Working with the e-Framework partners to establish Australian participation in the sustainable development of the e-Framework
- D6 Providing regular reports on activities
- D7 Providing support services to collaborators and key projects such as the FRODO projects as contributors to the e-Framework
